- PART II - The Primary Foreign Economic
Information Activities of Certain
Government Agencies (Tabulation
by Agencies)

S-E-C-R-E-T

S-E-C-R-E-T

APPENDIX "C"

Part I
(of two parts)THE PRIMARY FOREIGN ECONOMIC INFORMATION INTERESTS OF CERTAIN GOVERNMENT AGENCIES

This tabulation presents the primary foreign economic information interests of certain Government agencies. These interests are presented both with respect to categories of economic data and with respect to geographical area of interest. In this context, "interest" means that the agency concerned, in the pursuit of its operational responsibilities, regularly gathers from available sources the indicated category of information, whether or not it carries out collection in the field. With respect to the Soviet and Soviet Bloc areas, the tabulation of interested agencies is incomplete: only those agencies are indicated which have maintained an interest in certain basic and relatively unchanging categories of economic information over a considerable period. Neither the Foreign Reporting Service of the Department of State nor the Central Intelligence Agency are included in this tabulation. This omission is due to the fact that their respective mandates give them a prima facie interest in all categories and all areas. The agencies whose interests have been surveyed for purposes of this tabulation follow:-

Abbreviations

APPENDIX "C"

Part II
(of two parts)

THE PRIMARY FOREIGN ECONOMIC INFORMATION ACTIVITIES OF CERTAIN
GOVERNMENT AGENCIES
(1 Dec 1950)

The following statements present the primary foreign economic information activities of certain Government agencies. Indicated are the operational missions of these agencies as they pertain to foreign economic information; personnel qualifications and strength; the sources and nature of foreign economic information used; media for dissemination; and arrangements for the exchange of information among Governmental agencies and between Governmental and other agencies.

Neither the Foreign Reporting Service of the Department of State nor the Central Intelligence Agency are included. This omission is due to the fact that their respective mandates give them a prima facie interest in all categories and all areas.

The agencies whose activities are described are the same as those included in the tabulation of foreign economic interests, Appendix "C", Part I.

SECRET

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

CONFIDENTIAL

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Component:

OFFICE OF THE SECRETARY OF DEFENSE

Mission and Functions:

Economic potential of Allies and Friendly Countries.
Hostile capabilities of foreign nations.

Source:

Service intelligence; Central Intelligence Agency.

Component:

1. Office of Foreign Military Affairs

Component:

2. Office of Military Assistance

Source:

Receive project statements from countries seeking assistance.

Dissemination:

Nil.

Component:

3. Office of Progress Reports and Assistance

Mission and Functions:

Receive foreign military budgets, cost of living, occupation costs.

Dissemination:

Nil.

Component:

4. Military Assistance Advisory Groups

Mission and Functions:

Receive detailed information on factories, capacities, labor potential, etc.

Dissemination:

Nil.

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

CONFIDENTIAL

Component:

RECONSTRUCTION FINANCE CORPORATION

Mission and Functions:

Functions fall into three distinct categories:

(1) Relating to tin. To buy, sell, and transport tin, and tin ore and concentrates; to improve, develop, maintain, and operate the Government-owned tin smelter at Texas City, Texas; to finance research in tin smelting and processing; to do all other things necessary to the accomplishment of the foregoing. (2) Relating to synthetic rubber. In general, to maintain in the interests of national security a technologically advanced and rapidly expandable rubber-producing industry of sufficient productive capacity to meet essential military, naval, and civilian needs during times of national emergency. Specifically, to produce or acquire the quantities of synthetic rubber to fulfill mandatory requirements and, to the extent practicable, to satisfy the demand demand for voluntary use; to maintain at all times within the U. S. active or standby rubber-producing facilities having an annual rated production capacity of not less than 600,000 long tons of general purpose rubber and not less than 65,000 tons of special purpose rubber; to carry on research and development activities necessary to maintain a technologically advanced domestic rubber-producing industry; to lease and sell synthetic rubber-producing facilities within the limits of the Rubber Act of 1948, as amended; to take appropriate action with respect to patent pooling, patent licensing, and exchange of information agreements. (3) Relating to abaca. To encourage, develop, and maintain the production of abaca.

Sources:

Department of State

Dissemination:

Report of activities in above fields submitted to Congress in the "Annual Report of Reconstruction Finance Corporation".
A considerable amount of non-current foreign economic information exists in the files of: Defense Plant Corporation; Defense Supplies Corporation; Rubber Reserve Company. (All now dissolved)
U. S. Commercial Company - now in liquidation.

Foreign Economic Information Requirements:

Foreign economic studies or reports dealing with the development and production of abaca and those relating to the production of tin, tin ores, and concentrates. Information on synthetic rubber.

CONFIDENTIAL

Component:

EXPORT-IMPORT BANK OF WASHINGTON

Component:

1. Economics Division

Component:

2. Legal Division

Component:

3. Engineering Division

Component:

4. Examining Division

Component:

5. Private Capital Division

Mission and Functions:

Aid in financing and to facilitate exports and imports and the exchange of commodities between the United States or any of its Territories or insular possessions and any foreign country or the agencies or nationals thereof. Study of applications for loans and guaranties, the approval or disapproval of such applications, and the administering of loans and guaranties which have been approved.

Personnel Qualifications:

Technicians

T/O Strength:

135

Sources:

Foreign Service reports; Commerce; Interior; State; International Bank for Reconstruction and Development; U. S. Manufacturers; Foreign Traders; Financial Interests; Foreign countries; Credit applicants

Nature of Foreign Economic Information Used:

Banking and international finance; Economics; Engineering; Law

CONFIDENTIAL

Dissemination:

Semi-annual reports to the Congress - summarize the condition of outstanding credits and their repayments, and report on new credits established.

Arrangements:

National Advisory Council on International Monetary and Financial Problems (member); Department of Commerce; Air Coordinating Committee; National Security Resources Board; Bureau of Federal Supply; Munitions Board.

Foreign Economic Information Requirements:

All available raw and processed data on:

Economic

Engineering

Financial

Balance of payments of foreign countries

Gold and exchange reserves of foreign countries

Foreign trade

Financial strength of principal foreign banking institutions

Budgetary revenues and expenditures

Tariffs and other trade restrictions

Domestic and foreign markets for specific products

Sources and costs of raw materials, labor, and power

Ability of countries and individual enterprises to repay proposed credits

CONFIDENTIAL

Component:

FEDERAL COMMUNICATIONS COMMISSION

Mission and Functions:

Charged with responsibility of regulating interstate and international telecommunications services.
Required to have knowledge of telecommunications operations in foreign countries.

Sources:

Department of State (Foreign Service Officers); International Telecommunications Union, Geneva, Switzerland; Department of Commerce; International Civil Aviation Organization; United States international carriers operating telecommunications circuits between the United States and foreign countries; Other users of telecommunications operating in the international field, i.e., international airline operators; United States Operating Companies; International trade publications; Foreign operating agencies; United Nations specialized agencies.

Dissemination:

Occasionally performs special monitoring of the radio frequency spectrum, primarily for the purpose of locating foreign radio transmitting stations for government agencies.

Foreign Economic Information Requirements:

CONFIDENTIAL

CONFIDENTIAL

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Component:

CIVIL AERONAUTICS BOARD

Mission and Functions:

Although the economic work of the CAB deals primarily with U. S. flag carriers, it is necessary in many instances to examine foreign economic activities connected with aviation in order to determine and safeguard the interests of American carriers.

Sources:

Department of State; Foreign Missions to United States; United States and Foreign Air Carriers; C.A.A.; Post Office Department; Defense Department; Bureau of the Census; Bureau of Immigration and Naturalization; Aircraft Manufacturers; International Air Transport Association; International Civil Aviation Organization (ICAO); Domestic and international civil aviation policies of foreign governments.

Foreign Economic Information Used:

Operating, financial and traffic statistics of foreign air carriers. Economics of foreign air transport - rates, subsidies, routes, frequencies and capacity of services, equipment, personnel.

Dissemination:

Until recently distributed following publications: "World Directory of Scheduled Common Carrier Airlines"; "Equipment of the Foreign Scheduled Common Carrier Airlines"; "Foreign Air Briefs" (Confidential) - still issued weekly; Central file of reference material on foreign air transportation; Timetables of all United States scheduled international air carriers and from foreign scheduled air carriers; Record of aircraft owned and operated by such carriers; Records of ownership and control of foreign air carriers; "Airline Traffic Survey - International Section"; "Analysis of Transatlantic Passenger Traffic Outbound from and Inbound to NYC via U. S. and Foreign Scheduled Air Carriers".

Component:

Office of the Members

Mission and Functions:

Highest operating level of Board authority. Responsible for all formal actions, opinions, and decisions.

Personnel Qualifications:

Special Consultant in economic matters.

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

CONFIDENTIAL

CONFIDENTIAL

T/O Strength:

One (1)

Component:

2. Bureau of Law

Mission and Functions:

All legal work in connection with the issuance of certificates of public convenience and necessity, foreign air carrier permits, exemption orders pertaining to air carrier operations.

Responsible for all legal aspects of the Board's regulation of passenger, property, and mail rates and related matters; preparation and/or exchange of air transport rights; construction and interpretation of international treaties and agreements, and comparative law of foreign jurisdictions respecting aeronautics.

Component:

3. Bureau of Economic Regulation

Mission and Functions:

Interpretation of economic data and advice to Board regarding policy and procedure to be followed in economic regulation of domestic, overseas, and international air transportation; representing Board on various inter-departmental committees and at international conferences; advice to Board in relation to participation in formulation and negotiation of international agreements affecting air transportation.

Component:

a. Office of the Director

Component:

b. Foreign Air Transport Division

Mission and Functions:

Sole component dependent upon foreign economic information for performance of major portion of its responsibilities.

Negotiation, revision, and interpretation of bilateral air transport agreements between the United States and other countries; operating problems of United States carriers conducting foreign air transportation; preparation of recommended United States positions with respect to economic problems on the agenda of the ICAO.

CONFIDENTIAL

Mission and Functions (Continued):

Preparation of background studies on domestic and international aviation policies of foreign governments; domestic and foreign economic data; analyses of past operations; possibilities of improvement in the route pattern; foreign policy of the United States with respect to the need for service in all areas of the world.

Personnel Qualifications and T/O Strength:

Chief, GS-14	1
Assistant Chief, GS-13	1
<u>Economists</u>	
Air Transport, GS-12	1
Air Transport, GS-9	1
Foreign Affairs	
Analysts, GS-9	2
Air Transport	
Examiners, GS-9	2
Examiners, GS-7	1
Clerks and Stenographers	7

Component:

c. Operations Division

Mission and Functions:

Analyzing and recommending appropriate action on agreements and contracts, including all resolutions of the Conference of the International Air Transport Association, except those involving the reasonableness of rates; reviewing and recommending action on agreements between United States air carriers and foreign governments; examining stock ownership reports of United States air carriers and analyzing such reports for the purpose of apprising the Board and staff of potential conflicts which may arise out of ownership of substantial blocks of stock in competing enterprises; preparing background studies and recommending Board policies on non-scheduled operations.

Component:

d. Analyses Division

Mission and Functions:

Preparation of international airline traffic surveys; preparation of proposed United States positions on ICAO statistical matters; analyses of rate-fixing agreements concluded by United States and foreign carriers under the traffic conference machinery of the International Air Transport Association.

CONFIDENTIAL

Component:

- e. Accounting and Rates Division

Component:

- f. International Rates Section

Mission and Functions:

Prepare statements of tentative findings and conclusions in mail rate cases; in conjunction with public counsel, plan and prepare for rate hearings; formulate financial, statistical and operational analyses for rate hearings.

T/O Strength:

- (9) (10% of time on foreign economic activities)

Component:

- 4. Bureau of Safety Regulation

Mission and Functions:

Development of technical findings and recommendations governing preparation of safety rules, coordination of international standards adopted by the ICAO with the Civil Air Regulations of the United States; conduct of special study and research in air safety; prepares United States position on technical matters on agenda of ICAO and represents United States at meetings of Technical Divisions of the ICAO Air Navigation Committee; studies current technological developments and aviation practices; conducts technical research into transport and non-transport type aircraft, equipment, and operations.

Component:

- 5. Bureau of Safety Investigation

Mission and Functions:

Responsible for investigation of accidents involving civil aircraft of United States registry, both at home and abroad; of United States manufactured aircraft with foreign registry, and of foreign aircraft in the United States; analyzes and compiles aircraft accident statistics.

Component:

- 6. Bureau of Hearing Examiners

Mission and Functions:

Responsible for conduct and disposition of all formal proceedings for

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

CONFIDENTIAL

Mission and Functions (Continued):

certificates of public convenience and necessity for the operation of international routes by United States air carriers; and for foreign air carrier permits to authorize operations into the United States by foreign carriers; analyzes evidence submitted at hearings concerning proposed route patterns and their effect on the national economy.

Component:

DEPARTMENT OF COMMERCE

Component:

1. Bureau of Public Roads

Mission and Functions:

Administer Federal Highway Act of 1921 and subsequent related Acts which authorize Federal-State cooperative construction and development of the domestic highway system and cooperative work with other government departments in development of roads in national forests, parks, and Federal land reservations. This domestic function comprises the major activity, but incidental to this, special legislative direction or inter-agency agreements based on legislation have involved the Bureau of Public Roads in foreign road activities such as:

- (1) design, restoration and construction of roads, streets, and bridges in the Philippines destroyed or damaged as a result of the late war and which are needed for the economic rehabilitation and development of the Philippines.
- (2) assistance to Turkey in the improvement of their highway system through acquisition of and training in use of modern road and bridge construction and maintenance equipment and methods, using Greek-Turkish aid and ECA funds.
- (3) cooperative construction of the Inter-American Highway between the United States border and the Panama Canal, under assistance legislation to the Organization of American States.
- (4) various consulting assignments to Organization of American States members under the above referenced legislation to assist them in their highway programs.
- (5) occasional assignment of personnel to United Nations members under United Nations or related programs in connection with highway matters.
- (6) assignments of personnel in advisory or supervisory capacity to various nations in connection with loans for highway purposes granted by Export-Import Bank or World Bank; exploratory talks in progress on Iran.
- (7) an annual highway engineering school (training) for foreign engineers held for 16 weeks in May-September with 60 enrollees from 15-25 countries attending.
- (8) participation from time-to-time as directed in various international conferences or organizations relating to highways.
- (9) receiving numerous callers and providing varying amounts of information or training for foreign engineers visiting in the United States, varying from informal visits of an hour to in-service planned training programs of a year's duration.
- (10) other special assignments in foreign countries on highway work now completed--such as Trans-Isthmian Highway in Panama, Alaska Highway in Canada, work in Haiti and Dominican Republic, highway system planning in Bolivia, consultative service on highways to United States Army in Germany, construction of the Rama Road in Nicaragua, bridge construction supervision in El Salvador, planning assistance to Ecuador.

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Personnel Qualifications:

Experienced and trained highway engineers.

Sources:

Own and foreign personnel; Philippines; Turkey; United States border to Panama; Peru; Colombia; United Nations; Thailand; Iran; Ethiopia; Canada; Haiti; Dominican Republic; Bolivia; Germany (US Zone); Nicaragua; El Salvador; Ecuador.

Foreign Economic Information Used:

Extent and physical condition of highway systems.
Character and volume of traffic thereon.
Organization and finances available for system.
Relation to other forms of transport.
Construction capacity of the country.
Other factors pertinent thereto.

Dissemination:

"Considerable quantities of maps, tables, pictures, construction plans, specifications and related data in files showing highway characteristics in the named areas..." "The most complete data in existence on United States and Philippine highways are available...and similar data on Turkish highways are being developed."

Arrangements:

Inter-governmental agreements negotiated through U. S. Embassies.
Liaison with Defense and other U. S. Government Departments for exchange of information (but could bear expansion or strengthening).
Economic Cooperation Administration.
Organization of American States.
United Nations Programs.
Export-Import Bank.
World Bank.
International (highway) conferences or organizations.
European Command.
Far East Command.
Army Map Service.
National Intelligence Survey (CIA).
Department of State.

Component:

The Director of the Census

Component:

1. Office of the Coordinator, International Statistics

Mission and Functions:

- (1) Secure statistical publications from foreign countries, particularly those which present data in the fields of population, agriculture, industry, trade, and housing through an exchange agreement.
- (2) Handle correspondence from foreign areas and international organizations requesting statistical information for the United States; and to handle correspondence originating in the United States requesting statistical data for foreign areas.
- (3) Train foreign technicians who come to the United States under various auspices (many under State Department arrangements) to study census and other statistical methods used in United States.
- (4) To provide technical consultants to foreign countries, at their request, through the State Department.
- (5) In cooperation with the Library of Congress, to compile and publish bibliographies of statistical data for foreign areas.

T/O Strength:

18 United States

3 consultants to Haiti, Costa Rica, Ecuador.

Sources:

Publications Exchange Program

Direct contact with more than 200 foreign technicians.

Haiti

Costa Rica

Ecuador

Foreign Economic Information Used:

Foreign census final reports, detailed collection, and compilation documents.

Dissemination:

Services agencies and individuals on request.

Publishes quarterly bibliography of publications received from or relating to foreign countries for official use of agencies of the Department of Commerce and other staffs concerned with foreign areas.

Annotated bibliographies of published data compiled and published by the

Dissemination (Continued):

Census-Library Project (Library of Congress). Areas now included are Latin America, Europe, and Africa. Work in progress on Near East, Oceania. To date, bibliographies limited to population and vital statistics but plan for economic statistics, i.e. industry, business, mining, foreign trade, and agriculture.

Arrangements:

State Department; Economic Cooperation Administration; Library of Congress

Component:

2. International Population Unit (Now being organized to work for the CIA under a classified agreement between the Bureau and CIA).

Mission and Functions:

Perform certain studies of population trends and characteristics in foreign areas, with special emphasis on foreign manpower.

Sources:

Bureau of the Census; Library of Congress

Component:

3. Foreign Trade Division

Mission and Functions:

Compiles all import and export statistics of the United States.
Provides information relating to the exports of specific foreign countries to the United States.
(Principal analytical work on foreign trade statistics is performed by the Office of International Trade, Department of Commerce.)

Component:

Civil Aeronautics Administration

Foreign Economic Information Used:

Receives foreign economic data with respect to air transportation, and to a lesser degree telecommunications.

Component:

1. International Region

Foreign Economic Information Used:

Air Transportation
Telecommunications

Component:

2. ACC Facilitation Program

Mission and Functions:

Promote growth of United States air commerce abroad.
Safety of operations.
Technical aviation assistance to foreign governments.

Sources:

American flag carriers; World-wide field offices; CAA Technical missions to foreign governments e.g. Bolivia; Colombia; Greece; Ecuador; Panama; Peru; Venezuela; Philippines; Civil air attaches; Aircraft manufacturers (fgr. & US)

Foreign Economic Information Used:

Airfields (foreign); International routes; Passengers; Revenue; Fuel consumption; Route mileages; Numbers and types of aircraft; Airline employees; Foreign national training; International civil aviation organization; Exchange of technical information with foreign governments; "CAA representatives 'man the windows' by which the United States keeps abreast of technical aviation developments throughout the world and are the channels through which the United States shares its technical know-how in aviation matters with other nations."

Personnel Qualifications:

Operations agents; Radio technicians; Maintenance technicians.

CONFIDENTIAL

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Component:

United States Coast and Geodetic Survey

Mission and Functions:

Production of nautical and aeronautical charts of the U.S. and its territories to assure safe passage of commercial and military carriers by sea and air.
Engages in other scientific surveys and research in associated fields.
End products are directly related to the development of both foreign and domestic commerce and are essential to economic growth and development.
Establishment of mapping standards.
Development of safe navigational procedures.
Improvement of surveying instruments.

Foreign Economic Information Used:

Geodetic control surveys; topographic surveys; hydrographic surveys; tides studies; geomagnetism; seismology

Sources:

International program of technical cooperation.
Training of qualified foreign nationals in Coast and Geodetic Survey methods and procedures.
Sending technical missions to participating foreign countries.
International Geodetic and Geophysical Union.

Dissemination:

Technical manuals.

Arrangements:

Affiliation with foreign and international scientific organizations.
State Department.
Inter-American Geodetic Survey.
Hydrographic Office.
International Geodetic and Geophysical Union.
Commission on Cartography of the Pan American Institute of Geography and History.

Component:

(1) Tides

Mission and Functions:

Tidal survey program in Latin America

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Personnel Qualifications and T/O Strength:

Mathematicians	22 in Washington
Cartographic Survey Aids	3 in field
Engineers	2 foreign duty

Component:

(2) Geomagnetism:

Mission and Functions:

Magnetic surveys of United States areas.
Collecting and processing magnetic data.

Personnel Qualifications and T/O Strength:

Geophysicists	21 in Washington
Geophysicists	23 in field

Foreign Economic Information Used:

Collect world-wide magnetic data and provide world isomagnetic lines to the Hydrographic Office.

Dissemination:

Publish magnetic tables and isomagnetic charts of the U. S. and Alaska at regular intervals of five years.

Component:

(3) Seismology:

Component:

a. Division of Geomagnetism and Seismology

Personnel Qualifications and T/O Strength:

Geophysicists	10 in Washington
Geophysicists	7 in field

Sources:

Exchanges seismological data freely with foreign cooperating organizations and individuals (except USSR and satellites).

Dissemination:

Seismic probability maps constructed (earthquakes and tidal waves)
Seismic sea wave warning system.

Arrangements:

World-wide earthquake epicenter location program.

Component:

(4) Geodetic Surveys:

Mission and Functions:

Technical advice and inspection of South American surveys.

Personnel Qualifications and T/O Strength:

Officers 3 in South America

Foreign Economic Information Used:

First step in the plan which will ultimately produce an integrated topographic map of the entire hemisphere.

Component:

(5) Map Library:

Mission and Functions:

Large library of U. S. maps and complete world coverage of nautical charts.

Dissemination:

Chart exchange service.

Arrangements:

Interdepartmental Committee on Coordination of Map Procurement. Chart exchange service.

~~CONFIDENTIAL~~

Component:

Office of Business Economics

Component:

(1) Balance of Payments Division

Mission and Functions:

Compiles and publishes estimates of the balance of international payments of the U. S., including the balance of payments between the U. S. and individual foreign countries or areas. These data are used extensively in the formulation, planning, and execution of foreign economic measures.

Personnel Qualifications and T/O Strength:

Professionals; (Economists or Statisticians with special training and experience in international trade or finance) - 15; Clerical - 14.

Sources:

International exchanges of information, particularly on travel between the U. S. and Canada.

Bureau of the Census - trade statistics.

Treasury Department - capital movement statistics.

Foreign Economic Information Used:

Foreign investments; travel; shipping.

Dissemination:

Publish balance-of-payments estimates, together with such collateral information in special fields, such as foreign investments; travel, shipping, etc.

Quarterly estimates of the balance of international payments of the U. S. broken down by major geographic areas, in the "Survey of Current Business" More detailed reports in bulletin form, e.g.: "The Balance of International Payments of the United States, 1946-48".

Collateral information as time and resources permit.

Arrangements:

Dominion Bureau of Statistics.

Component:

(2) Office of Field Service.

~~CONFIDENTIAL~~

CONFIDENTIAL

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Mission and Functions:

Represents the constituent units of the Bureau of Foreign and Domestic Commerce as well as the Bureau of the Census and the Foreign Economic Administration in the (U.S.) field.

Provides a medium through which programs of these offices may be translated into action throughout the U.S.

Furnishes current information on business conditions and problems as factors to be considered in the formulation of their basic policies.

T/O Strength:

Nil in foreign field.

Sources:

Utilize private sources of information, such as trade publications, manufacturers' associations, banks and international trade organizations.

Dissemination:

Disseminate information on export-import controls, exchange restrictions, tariff rates, special marketing requirements, accepted trade practices, techniques.

Component:

(3) Office of Industry and Commerce

Mission and Functions:

"Does not engage in any foreign activities".

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Component:

Office of International Trade

Mission and Functions:

Foster and promote the international trade of the United States.
Promote U. S. trade interest in exports and imports.
Furnish information, analyses, advice and special services.
Encourage and facilitate international trade and foreign economic development activities.
Cooperate with representatives of other nations in the solving of economic, trade and exchange problems through international organizations, conferences, and otherwise, and by other suitable means, including liaison with foreign embassies and with appropriate organizational units of the Department of State.
Administer the export control program (Public Law 11, February 26, 1949, 81st Congress).
Assist the Assistant Secretary for International Affairs in coordinating the Department's Point IV activities.
Prepare estimates of non-military materials and commodities required by foreign countries, or for foreign purposes other than those represented or presented by other official claimants pursuant to the provisions of Executive Order 10161 and serve as claimant for such requirements before the Advisory Committee on Export Policy, or as necessary, before the Advisory Committee on Priorities Administration.
Foreign requirements for materials in short supply.

Component:

(1) Deputy Director

Mission and Functions:

Administration of the Export Control authority, the foreign requirements and claimancy functions, and foreign development (Point IV) responsibilities.

Component:

(2) Assistant Director

Mission and Functions:

Supervise export supply functions including export control operations.

Component:

(3) Assistant Director

Mission and Functions:

Supervise foreign requirements and claimancy functions.

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

CONFIDENTIAL

~~CONFIDENTIAL~~

Component:

(4) Assistant Director

Mission and Functions:

Supervise foreign development activities.

Component:

(5) Assistant Director

Mission and Functions:

Supervise intelligence and services activities.

Component:

(6) General Counsel

Mission and Functions:

Responsible for the legal promulgation of export control regulations and procedures, compliance proceedings, and legal aspects of Point IV activities.

Component:

(7) Executive Secretary of the Foreign Trades Zones Board

Mission and Functions:

Supervises the analysis of applications for permits to establish and operate foreign trade zones, preparing reports and recommendations to the Committee of Alternates and the Board regarding such applications, and preparing its annual report to the Congress.

Component:

(8) Export Control Investigation Staff

Mission and Functions:

Investigates violations of the Export Control Act and regulations thereunder. Effects external and internal enforcement of export control laws and regulations.

Determines proper safeguards for the issuance of licenses, and insuring the enforcement here and abroad of the terms and conditions of licenses.

~~CONFIDENTIAL~~

CONFIDENTIAL

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

Component:

(9) Geographic Divisions

Mission and Functions:

Collect, analyze, and disseminate information on economic, commercial, and financial developments in all foreign countries, including information on tariff rates and regulations, licensing requirements, income tax laws, sales taxes, exchange controls, foreign trade, commercial laws, general business conditions, balance of payments, national income, customs regulations, foreign exchange restrictions and taxes, internal transportation, and plans for economic development.

Advise representatives of American business who are interested in making investments abroad, or in obtaining financing from national or international agencies, with respect to the adaptability of their plans to the economic needs of the countries where the investments are to be made, and with respect to changes necessary to such plans in light of the economic and financial regulations and foreign trade structures of such countries, by providing specific information regarding company organization, legal restrictions, taxation, wage rates, labor laws and similar matters affecting prospective investments.

Provide advice to American businessmen, and to other Government agencies, with respect to economic conditions in foreign countries for which economic development programs are planned and with respect to the probable future requirements of such countries for economic and financial assistance, as a basis for sound planning by American business as to its participation in such programs.

Analyze programs for development of foreign countries, with a view to the determination of U. S. policy and particularly regarding the utilization of U.S. technical skills, the sale of U.S. equipment, markets in the U.S. for needed imports, opportunities for private investment and suitability of financing by international banks; and participate jointly with the industry divisions of the NPA where commodities or products are involved. Participate in the negotiation of trade agreements under responsibilities assigned by Department Order No. 66 (revised) collaborating with the industry divisions of NPA in determining departmental policy and making the analyses and reports required in connection with the Reciprocal Trade Agreements Program.

Initiate action through the Foreign Service to protect American business against discriminatory or inequitable measures affecting foreign trade. Administer Department activities in connection with the British Token Import Plan and the China Trade Act.

Maintain liaison with foreign embassies, legations, purchasing or other missions on export control matters; determines specifications and data to be required of foreign governments on requirements and justification of needs; analyzes requirements data in terms of the economy of each country, its financial resources, production, manpower, alternative sources, etc.; recommends and participates in determining the country quotas for each commodity; provides continuous scrutiny and study of economic development in importing nations, industrial production, foreign trade, etc.; particularly analyzing past import programs, with a view to making necessary adjustments of modifications of successive requirements programs of each importing country.

Identity and activity of foreign competitors of American producers and exporters.
Operations of foreign cartels, buying organs, and trade groups.
Trade barriers, governmental and private.
Foreign buyers, sales agents, distributors, etc.
Consular reports (Confidential)

Dissemination:

Annual Report to Congress on trust laws and unfair competition and other trade regulations abroad.
Special investigations and reports, such as: "Report on Unfair Practices in International Trade" prepared for the Conference for the Limitation of Armaments in 1921, covering laws, conventions, and international agreements between governments concerning unfair trade practices.

"Report on Cooperation in Foreign Countries" prepared and sent to Congress in 1924, covering foreign cooperative laws and other information obtained by a field inquiry in Europe by the Chief of the Export Trade Division and a Commissioner.

"Report on Alleged Violation of Antitrust Laws by Combinations being formed abroad by American Firms and Alleged Dumping of American Goods in Foreign Markets", prepared in 1926 at request of a group of Senators who were considering antidumping legislation. This inquiry included field investigation and covered United States and foreign legislation.

"Report on Antidumping Legislation and other Import Regulations in the U.S. and Foreign Countries"; 1934

Supplementary Report as above; 1938

Reports of formal investigations of the operations of certain export trade associations, e.g. Florida Hard Rock Phosphate Export Association, Pipe Fittings and Valve Export Association, etc.

Work now in progress: Report on the cartel activities in the international petroleum industry, with special reference to the Middle East, based in substantial part upon documents subpoenaed from American petroleum countries.

Report upon the shortage of iron ore, based upon questionnaires answered by the companies producing and consuming iron ore, which includes information as to foreign ore supplies.

Brief report on factors affecting the present supply of tin, being prepared from material available in various government agencies. Anticipated that this report will be followed by other brief reports upon other imported commodities.

Types of past reports include: International phosphate cartels. The Copper Industry (1947), etc.

Approved For Release 2000/08/28 : CIA-RDP67-00059A000100050004-1

CONFIDENTIAL

~~CONFIDENTIAL~~
